may as well look it in the face. The results of a whole year of time, of half a dozen battles, of an outley of more than two hundred millions of dollars, are pendent on the success of the enemy's attempt. And we know of no remedy save that heroic one of sending Halleck, who is responsible for the army's movements, back to the captaincy for which he is best fitted, or to the Mohawk and the cablages among which he was raised. The disaster now threatening has been foreseen for mose the as month. It has been the comstant theme of the rebel papers and their londest beast. TATE SQUELCERD.

It is known that attempts have been made to represent certain robel States, from which the Confederate armies have been wholly or partially driven, in the present Congress. In Louisinus a sort of midnight arrangement was gotten up, the promoters of the scheme being about equally divided as to numbers between copperheads and out and out robels. The thing was puffed up in the New York Hereld and kindred sheets as a return of the citians of the State to their allegiance, de-

It will be seen that Detective Jones was much excited. He telegraphed so many times, and acted to precipitately, that it was impossible to reach blim in time with instructional from the New York office. He did not wait for any answer to his animorous dispatches; and if he gets into trook it is the pown fruit. For, on receipt of his telegram of the 50th, Mr. Kannedy of his telegram graph—on the sum day, "We want barke, there is no indictment against Levis."

(Death of a Copparhead Paper.
The material and press of the Philadelphia
Evosing Journal were sold at auction a new
days since. The property was select for
rent. The paper died of copperheadism.
How unproductive were such principles is
shown in the fact that the paper impoverished all connected with it. Kardy 80,000
rent was due at the time the Constable
closed the doors. The sale was mostly attended by news hoys who vastly egyped the
fun. Thus goes to the dogs another of these
venomous copperhead prints. Several others
are preparing to follow.

The First Brigade, General Leggett's, elationed at Black River, was reviewed at eight o'clock; the Second, General Force's, at noon, on the pends ground by the river, and the Third, General Maithy's, at this came, east of the civ. are, with the sad tear of regret at parting.

Gen Logan leaves here to morrow or the say efter, to assume command of the 15th army corps, to which the order of the Secretary of War assigns him. Many aloers regrets will follow him from Vioxaburg. As a poet commander, by his uncompromising fidelity and impartial justice, he gained the esteem and admiration—if not of rebels—of all loyal, well disposed citizens and soldiers. As a division commander. Napoleon could not have been more trusted and beloved by those under his command than Logan is today by every man in the Taird Division, not only that, but in the 17th army corps.

That his success in the new and more important pedition upon the duties of which he is now about to enter, may equal if not surpass his former brilliant achievements, is the antiversal hope and expectations.
